PROFESSIONAL SUMMARY

I've owned design end to end more than once - not just screens, but the brand underneath them. At Uncover I designed the logo and identity from scratch, then carried it into the product myself. At FuelBuddy and I-DOD I built design systems from nothing and worked directly with founders turning ambiguous problems into shipped product. Right now at Crevia I run visual language, campaigns, and product surfaces across four client brands at once. Six years across product, UX, and brand - comfortable holding the fundamentals and breaking them when the idea is better.

CORE SKILLS

Product & UX: User flows, wireframing, prototyping, high-fidelity UI, usability testing, web and mobile

Systems & Brand: Design systems built from scratch, identity and visual language, brand consistency at scale
