PROFESSIONAL SUMMARY

I shoot and cut real environments under real pressure - festival crowds, artist green rooms, weddings moving in real time - not controlled studio setups. That's the same muscle a factory floor needs: catch what's actually happening, understand it fast enough to frame it right, and turn it around on a short clock. I haven't filmed manufacturing before, but I've spent 10+ years getting good at exactly the part that's hard to teach - reading an unscripted environment and coming back with a story, not just footage.

CORE SKILLS

Field Videography: On-ground event and live coverage, fast setup in uncontrolled environments, multi-camera shooting, run-and-gun style

Post-Production: Premiere Pro, DaVinci Resolve, After Effects, CapCut, story-first pacing, sound design, color correction, quick-turnaround edits

Photography: Studio & location, product, corporate and event work since 2016

AI & New Tools: Comfortable adopting new edit/production tools quickly (Claude, Runway, Veo, Higgsfield)
