PROFESSIONAL SUMMARY

I've spent six years jumping into different problem spaces and shipping - healthcare, fuel-tech, logistics, fintech, genomics, AI automation, consumer brands - which is the muscle a studio building multiple ambitious products at once actually needs. I own design end to end: flows, systems, high-fidelity UI, and I've built design systems from scratch more than once rather than inheriting one. Comfortable moving fast with founders on undefined problems.

CORE SKILLS

Product & UX: User flows, wireframing, prototyping, high-fidelity UI, usability testing

Systems: Design systems built from scratch, Figma components, developer handoff

Range: Healthcare, fintech, logistics, genomics, AI automation, consumer and B2B products

Delivery: Direct founder collaboration, fast iteration on ambiguous problems
