PROFESSIONAL SUMMARY

I cut for pacing, music, and visual hierarchy first - the technical stuff is only useful once the story holds together. That's come from editing everything from festival and concert coverage to wedding films to brand social content, on a fast clock, with my own edit workstation so delivery isn't the bottleneck. I'm not filling a 0-2 year seat for the badge - I'm already doing this work daily and I'd rather do it for a studio whose packaging and brand work I actually respect.

CORE SKILLS

Editing: Premiere Pro, DaVinci Resolve, CapCut, timeline pacing, story-first structure, trims that protect rhythm

Sound & Music: Sound design, music selection and sync, how audio elevates a cut rather than just filling silence

Motion & Trends: After Effects motion graphics, current formats and viral structure, performance-creative editing

New Tools: Actively using AI tools in the edit process (Runway, Veo, Higgsfield) - curious by default, not resistant
